Senior Full-Stack Engineer / AI Lead building production AI systems from customer workflows. At Namefi, leads domain sales automation, listing intelligence, brand generation, and analytics across discovery, agent/workflow design, evaluation, full-stack implementation, and deployment. Previously led Yuppies Tech, translating ambiguous client goals into shipped systems for Airbus Tripset, Mitsubishi Motors MiAR, ZebPay, Texts.com, Veera Browser, and Memorang.

Experience

Namefi

Domain registrar and marketplace infrastructure with production AI workflows for domain owners.

Senior Full-Stack Engineer / AI Lead

Remote · Dec 2024 - Present

- Led customer discovery with large domain owners and built Namefi Outbound, reducing sales research/outreach prep from days to minutes through buyer-fit hypotheses, web research, lead scoring, contact discovery, and editable drafts.
- Built Brand Studio, a multi-stage AI branding workflow that turns domains into buyer-ready logos, posters, and motion concepts with strategist/concept passes, exact domain/TLD constraints, and animation workflows.
- Built Namefi Feed, an AI-enriched listing intelligence layer indexing roughly 4,000-5,000 public domain listings from X, NamePros, DNForum, and marketplaces into searchable/RSS surfaces.
- Built production registrar and domain systems across registrar integrations, DNS/DNSSEC, nameservers, ENS/.eth, renewals, payments, checkout, analytics, and Temporal-backed long-running workflows.

Yuppies Tech

Founder-led product engineering consultancy for high-ambiguity client work.

Founder / Technical Lead

Mumbai / Remote · 2021 - 2025

Founded and led a product engineering consultancy; translated ambiguous client goals into shipped systems across travel, automotive, crypto, messaging, browsers, and AI education.

Memorang: Head of CMS for an AI education platform, translating Cambridge/TOEFL requirements into a schema-first AI CMS for generated questions/media, adaptive practice, scoring workflows, and content operations; modernized JS/Flow to TypeScript/Bun/Biome.

Veera Browser: led Android Chromium browser delivery from zero to Play Store, owning Chromium/Brave patch management, build/release tooling, rewards/feed/onboarding/search/tabs, privacy/security updates, and later iOS platform setup.

Texts.com: built production Messenger channel by reverse-engineering undocumented infrastructure and implementing MQTT/Facebook Thrift, encrypted payloads, sync, groups, attachments, reactions, receipts, typing, and presence.

ZebPay: client-facing technical lead for a 10-person team modernizing iOS/Android apps, release infrastructure, exchange features, payment flows, and international KYC; moved stabilization releases from monthly/bi-monthly to weekly.

Mitsubishi Motors: client-facing technical lead for MiAR, turning remote dealership goals into native iOS/iPadOS and WebAR with optimized 3D vehicles, low-end Android support, bilingual content, and contest/admin workflows.

Airbus Tripset: solo technical partner to MilkinSide for Airbus's public iOS/Android COVID travel companion, translating urgent traveler guidance needs into app/backend layers over Airbus/Amadeus APIs, CMS rules, and itinerary notifications.

Kult App

Consumer beauty and skincare commerce.

Vice President of Tech

Mumbai · Jan 2020 - Dec 2020

- Built the first product and technical foundation for a consumer beauty/skincare shopping app from the ground up across AWS, Elixir, Swift, and Kotlin.

Yilu, Lufthansa Group / BCG Digital Ventures

Smart travel platform for Lufthansa Group.

Founding Engineer

Berlin · Nov 2018 - Dec 2019

- Built native mobile architecture, CI/CD and release automation, Terraform-backed AWS web infrastructure, and iOS/Android features for Eurowings.
- Helped hire and structure the initial engineering team through job descriptions, technical tasks, interviews, and Scrum Master responsibilities.

8fit

Fitness and nutrition platform, now part of Withings.

Senior Technical Architect

Berlin · Nov 2017 - Oct 2018

- Architected a hybrid Apple TV fitness app that reached #1 Health & Fitness in Germany and 30+ countries and #7 in the US.
- Built cross-platform mobile features across JavaScript, Swift, Objective-C, Java, and Kotlin.

Housing.com

Indian real estate search and transaction platform.

Team Lead

Mumbai · Oct 2016 - Oct 2017

- Led cross-platform mobile architecture and the team transition to React Native, built in-house release/CI/CD systems, and contributed to Housing.com's PWA.
- Published the Housing Engineering article 'How We Built Our React Native App' covering architecture, release automation, testing, performance, and team migration.

Earlier Consulting and Startup Work

Bridg, 1mg, HornOk, Volkno, Meriad, and self-employed work.

Software Engineer / Consultant

Los Angeles / India · 2015 - 2016

- Built startup web/mobile systems across customer-data email tooling, real-time doctor consultation, IoT fleet management, and JavaScript/Java/Ruby on Rails product engineering while studying Computer Science at UCLA.

Education

University of California, Los Angeles

BS, Computer Science and Engineering.

Computer Science and Engineering

Los Angeles, CA · 2013 - 2016
