

Sid Jain

Senior Full-Stack Engineer / AI Lead

Mumbai, India / Remote | sid_26@outlook.com | linkedin.com/in/f0rr0 | github.com/f0rr0

Summary

Senior engineer and technical founder with 10+ years across AI products, mobile/platform engineering, developer tooling, and high-stakes client delivery. Founded Yuppies Tech and led technical execution for Airbus, Mitsubishi Motors Puerto Rico, ZebPay, Texts.com, Veera Browser, and Memorang; now leading AI product engineering at Namefi.

Skills

AI product: Agentic workflows, AI-native UX, prompt/workflow design, generation systems, research agents, analytics copilots

Full-stack: TypeScript, React/Next.js, Node.js, APIs, Postgres, backend services, Temporal, CI/CD, product architecture

Mobile/platform: React Native, Swift, Kotlin, Objective-C, Java, Chromium, release automation, App Store/Play Store delivery

Leadership: Founder-level ownership, client-facing discovery, technical roadmap execution, team leadership, design partnership

Experience

Namefi / D3ServeLabs – Remote

Dec 2024 – present

Senior Full-Stack Engineer / AI Lead

- Lead AI product engineering across Outbound, Brand Studio, and Feed while contributing core registrar, DNS, payment, checkout, and workflow infrastructure.
- Built registrar and domain infrastructure across registrar integrations, DNS/DNSSEC, nameservers, ENS/.eth, renewals, payments, and Temporal-backed long-running workflows.
- Built internal AI/product analytics surfaces across product usage, search, social, and funnel data, enabling product managers to ask natural-language questions over operating metrics.

Yuppies Tech – Mumbai / Remote

Jan 2021 – present

Founder / Technical Lead

Product engineering consultancy founded and led by Sid; client-facing technical partner and hands-on technical lead across travel, automotive, crypto, messaging, browsers, and AI education.

- **Airbus Tripset:** solo technical partner to MilkinSide for Airbus's public iOS/Android COVID travel companion; built the React Native app and backend aggregation layer over Airbus/Amadeus APIs, CMS-driven travel guidance, and itinerary notifications.
- **Mitsubishi Motors Puerto Rico / MMSC:** tech lead for MiAR virtual dealership and Outlander AR campaign; led native iOS/iPadOS and WebAR delivery with optimized 3D vehicles, low-end Android/browser support, bilingual content, and contest/admin workflows.
- **ZebPay:** technical lead for a 10-person embedded team modernizing iOS/Android apps and release infrastructure for one of India's largest crypto exchanges; shipped exchange, payments, wallet SDK, international KYC, and OTC workflows.
- **Texts.com:** built the production Facebook Messenger channel over undocumented/private messaging infrastructure, implementing protocol-compatible MQTT/Facebook Thrift handling, encrypted payload support, and feature-parity messaging.
- **Veera Browser:** led Android Chromium browser delivery from zero to Play Store, owning Chromium/Brave patch management, build/release tooling, rewards/feed/onboarding/search/tabs, privacy/security updates, and later iOS platform setup.
- **Memorang:** Head of CMS for an AI education platform; led schema-first AI CMS work for Cambridge/TOEFL content, dynamic question/component types, schema versioning, AI-generated questions/media, adaptive practice, and scoring workflows.

Earlier Experience

Kult App – Mumbai

Jan 2020 – Dec 2020

Vice President of Tech

- Built the first product and technical foundation for a consumer beauty/skincare shopping app from the ground up across AWS, Elixir, Swift, and Kotlin.

Yilu, Lufthansa Group / BCG Digital Ventures – Berlin

Nov 2018 – Dec 2019

Founding Engineer

- Built native mobile architecture, CI/CD and release automation, Terraform-backed AWS web infrastructure, iOS/Android features for Eurowings, and helped hire the initial team.

8fit, now part of Withings – Berlin

Nov 2017 – Oct 2018

Senior Technical Architect

- Architected a hybrid Apple TV fitness app that reached #1 Health & Fitness in Germany and 30+ countries and #7 in the US; built cross-platform mobile features.

Housing.com – Mumbai

Oct 2016 – Oct 2017

Team Lead

- Led cross-platform mobile architecture and team transition to React Native, built in-house release/CI/CD systems, contributed to Housing.com's PWA, and published the Housing Engineering article "How We Built Our React Native App."

Bridg, 1mg, HornOk, Volkno, Meriad, self-employed – Los Angeles / India

2015 - 2016

Earlier Consulting and Startup Work

- Built startup web/mobile systems across customer-data email tooling, real-time doctor consultation, IoT fleet management, and JavaScript/Java/Ruby on Rails product engineering while studying Computer Science at UCLA.

Public Work

oliphant

Rust project for embedded Postgres inside apps/tests; 82 stars and 8 forks as of 2026-06-25.

react-native-rating

Cross-platform React Native rating component built with Animated and the native driver; 91 stars and 7 forks.

How We Built Our React Native App

Public Housing Engineering article covering React Native architecture, release automation, testing, performance, and team migration.

Education

University of California, Los Angeles

2013 – 2016

BS in Computer Science and Engineering
